

Increase savings with asset storage and management

IPS offers efficient, documented storage for all your critical rotating assets and equipment.

Properly storing your equipment reduces unplanned downtime and inventory. IPS' documented storage program provides preventive maintenance services and monthly testing on your equipment, ensuring that it is ready to install when you need it. We work with your plant MRO and reliability programs to ensure a seamless integration.

- ✓ 800,000+ sq ft of warehouse space and 70-ton lifting capacity at service locations across North America
- ✓ Temperature and humidity-controlled environments
- ✓ Compliant to ANSI-Level B standard
- ✓ Free of any resonant vibrations (protects bearings)
- ✓ Monthly shaft rotation
- ✓ Windings meggered quarterly
- ✓ 24/7 on-call service for fast shipment
- ✓ IPS rewind warranty starts at time of shipment
- ✓ 24/7 accessible full documentation on motor inventory and maintenance history through IPS Tracker
- ✓ Large-scale project support through inventory management

Documented testing and maintenance keep your critical spares ready to ship 24/7

24/7 service and delivery

Our field service technicians are ready to deliver, install and align your spare equipment to get your operations up and running.

Full documentation

We provide you with documentation in writing of our test and maintenance procedures. Our ISO-compliant documentation ensures IPS service technicians always follow approved methods for storing and managing your rotating assets. These documented processes not only reinforce our commitment to quality and service, they also help our services align with your MRO, reliability and disaster recovery programs.

Scheduled maintenance and testing

We offer regular maintenance and testing to ensure that your spares will run when needed. This includes monthly shaft rotation and quarterly Megger tests for windings. IPS also provides additional regular maintenance upon request, such as nitrogen purges on equipped motors, energizing space heaters, and MCE testing.

Real-Time information available 24/7

IPS Tracker is a customer tool that gives you real time updates on your active storage inventory, including full documentation, images and maintenance records.

Project management

IPS can manage a broad spectrum of assets that are involved in large-scale projects. We work with you to determine what is needed to maintain your assets over the course of storage. Our materials management software provides customer accessibility through IPS Tracker, allowing you to see, in real time, your projects in active inventory.
