

Increase savings and minimize downtime with IPS' Dodge TXT Gearbox Exchange Program

The Dodge TXT Torque-Arm is a durable shaft-mount helical gear reducer specifically designed to perform in demanding applications.

The TXT gearbox frequently faces exposure to airborne contaminants, extreme temperatures, and moisture. Such exposure can result in wear and tear on the gearbox components, eventually leading to failure. Performing regular preventive maintenance can be challenging since many of these gearboxes are located in areas that are difficult to access.

The Dodge TXT Gearbox Exchange program is a quick, efficient, and cost-effective solution to get your TXT reducers up and running again. IPS can exchange your failed TXT reducer for a re-manufactured unit that is in stock and ready for shipment.

Dodge TXT Exchange Program advantages:

- ✓ IPS-trained technicians with expert knowledge and experience
- ✓ Genuine Dodge brand parts are used to ensure that your TXT gear reducer operates as designed
- ✓ Remanufactured according to Dodge manufacture specifications, procedures, drawings, and parts
- ✓ One-year warranty for all remanufactured units
- ✓ Available and ready for immediate shipment

The Dodge TXT Exchange Program Process:

1. Identify what the customer needs

IPS will identify the size and specifications of your failed TXT unit. If we have a remanufactured product in stock we can ship immediately for installation.

2. Inspect the condition of the TXT gear reducer

The customer has 15 days to ship their failed TXT reducer to IPS for inspection. Once we've inspected and approved the returned unit for repair, it becomes a replacement unit and we issue a credit to the customer for the core charge.

3. Remanufacture the exchanged TXT gear reducer

We remanufacture the exchange TXT according to Dodge specifications and with Dodge brand parts. It then goes into inventory and is ready for shipment.

Customers can exchange their failed TXT reducers for replacements that are remanufactured to Dodge engineering specifications, with Dodge brand parts and backed by a one-year warranty. We stock remanufactured units in the most widely used sizes, and can immediately ship an exchange unit minimizing downtime.

A returned unit must have a reusable housing (carcass) for it to be remanufactured as a future exchange unit

IPS stocks remanufactured Dodge TXT exchange units ready for immediate shipment, to reduce unexpected downtime
